

How long will it take to double your money? Use the rule of 72

Investment tip

- Remember, investments with a greater rate of return are often higher risk. When choosing investments, it's important to select ones that won't keep you up at night.
- You can also use the rule of 72 to determine the impact inflation will have on your cash. For example, if inflation is 2%, your \$1 today will be worth \$0.50, or half, in 36 years.
